

Women entrepreneurship plays a significant role in the development of national economies and growth. Nevertheless, although they represent half of the population, women are still not equally present in the higher management level, neither in the BiH, nor globally.

Although many initiatives in the area of women entrepreneurship have affected the BiH region, there is still a lack of consistency and a good combination and correlation of bottom-up and top down-initiatives. In addition, lack of strong national policies related to the strategies in women entrepreneurship creates a improper representation of the woman in businnes and inability to be a part of the decission making system.

Our goal is Impoivering woman to activly participate in Climate changes and environment protection versus circular economy,enterprenounship and overal inclusion business. Tipe and form of activities are Mapping,Mentorship ,Networking and Advocacy .
